Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Claims 13-22 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on March 8, 2005.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Fonstad, Jr. et al (US Patent 6,455,398).

Fonstad discloses a method for bonding substrates together. In this method, dielectric films 16 and 20 are provided on silicone layer 14 and on the surface of substrate 18. Substrate 18 is then bonded to substrate 10 with the films functioning as applicant's claimed bonding substrate material. At col. 5, lines 37-46, Fonstad discloses chemo-mechanical polishing to remove surface roughness in the range claimed by the applicant. At col. 6, lines 37-54, Fonstad teaches annealing the materials at 150°C and 250 °C for 15 hours each. At col. 5, lines 16-17, Fonstad discloses densifying the deposited oxide layer (i.e. increasing the bond site density) in the manner claimed by the applicant.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 5-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fonstad, Jr. et al as described above in paragraph 3.

It is the examiner's position that without the disclosure of unexpected results, the bonding technique and materials used are within the purview of one having ordinary skill in the art and would have been obvious to employ in the method of Fonstad based upon desired physical properties of the articles being manufactured.
